An Essential Tool for Choosing a Candidate

Musculoskeletal system (continued)	Yes	No	If Yes, specify the affected part and which side	Date (yyyy-mm-dd)
Lower limbs				
Hip sprain or fracture or bursitis or dislocation. On which side?	<input type="checkbox"/>	<input type="checkbox"/>		
Knee sprain or fracture, meniscus or ligaments tear. On which side?	<input type="checkbox"/>	<input type="checkbox"/>		
Foot, ankle or toes sprain or fracture or ligaments tear.	<input type="checkbox"/>	<input type="checkbox"/>		

PEMQ represents a proven means of action, very effective and appreciated by our clients to choose a candidate for a particular job. It ensures that the selected candidates do not have any functional limitations preventing them from performing the duties of the intended job, therefore optimizing the duties performance safely. PEMQ is an indispensable tool for human resources management in companies.
